

Ignite Platinum Support

Next Generation Support for Ignite Solutions

Ignite Platinum Support is designed for customers who are looking to get the most mileage out of their **Ignite Solution**. It is concierge level service combined with a product experience that is otherwise typically available through more expensive professional services.

Ignite Platinum. Preventive, Personal and Always On.

Platinum Experience Manager: A Platinum Experience Manager (PEM) is a designated support leader who ensures support works well for you, providing status reports, managing escalations, and proactively alerting you to expected issues around which support plans can be implemented. Your PEM ensures that our support fully meets your needs.

Managed Upgrades: Save countless hours in test and troubleshooting by allowing our team of experts to assist you in your upgrade. Our rigorous process will take the headache out, allowing you to enjoy the benefits of the latest releases – without the pain to make them happen.

Solution Health Check: Maximize your investment by allowing Ignite to analyze the quality and effectiveness of your software

implementation. Ensure your software is optimized with best practices provided through a process review that concludes with Ignite's expert recommendations.

OnDemand Training: Just-in-time training to help maximize your overall impact. Easily induct new hires which means they spend less time training and more time producing. Get unlimited access to your OnDemand training videos – and Platinum customers participate in the prioritization of future training topics.

Always On Service: VIP Treatment with highest level priority on all feature and support requests including local Platinum Hotline.

Serious Savings for the Long Haul.

We offer the unique ability to lock in your maintenance and support pricing with no annual price increases for **one, three or five years**.

Ignite Support Programs

Ignite is committed to offering support that delights our customers, no matter how big or small they are and no matter what Ignite product they are using. For those customers looking to get the most mileage out of their solutions, we recommend Ignite Platinum Support. This level of preventive, personal and “always on” support offers concierge-level service, combined with product support that other companies only offers through more expensive professional services.
